

My website tools:

Hey deepseek I want you to make this website for me! WHICH HAS HIGH **UI AND UX**

THE WEBSITE PUBLIC TO ALL USERS SHOULD HAVE:

INDEX.PHP

❖ Top nav :

1. It should have a logo in corner with gf plaza like that in the .php file I attached and there will be other top navs on other side and as seen on that .php file.
2. It should be responsive to all devices if the media screen is for mobile it should have a hamburger menubar when clicked it should show the top navs and should have a closing button in form of X.
3. There will be a switch theme (dark and light) button.
4. It should have hover at lower border hover like in file I gave you in the file.

❖ Body :

1. There should a fit hero-image with some text on it and a button saying view available spaces.
2. After hero there should be part why choose GF PLAZZA. Some text and you should use font-awesome fonts. Showing high speed internet security premium amenities, service etc...
3. The most powerful part is the available spaces where it will get the information from database if nothing in database it will display a well-designed text box showing text.
 - I. If there are rooms in the database it will first of all show a picture of it will be cropped but it must fit and in that product box there will be the price (to attract customers it will show the discount where there will be two prices the greatest one and small one greater should be strikedthrough).
 - II. There should be if it is booked or available (booked should be in yellow but attractive and available in green).

III. There will be a book now button it should be well designed. When clicked book now it will open a section under the selected room to enter name of people who is booking, his email and his phone number he/she phone number and names should be mandatory and should be marked as optional then have submit booking. When user using mobile phone and click submit booking it will directly open phone app and type “*182*1*1*0794411286*[amount]#” and when on pc it will show the pop-up message saying “open phone app and call *182*1*1*0794411286*[amount]#”

4. After that there will be a part showing the testimonies of people who used our plaza there will be two people.
5. I want you also to put a space for jobs if no jobs in the database the jobs section display will be = none;. When job is available it will be in a well-designed section and on its bottom it will have a button apply when clicked it will display an input section with first-name, second-name, phone number, email, national id(16 numbers) number/ passport(it is in integers), and upload cv(it will be only .pdf format and naming should be like applicantNameCv.pdf) then submit application.
6. The next session is contact us
 - I. It will show our location
 - II. Contact
 - III. Email
 - IV. Headquarter.

❖ Now it is time for footer:

- I. It should not be light.
- II. It should have logo to direct to home and some descriptions.
- III. It should have quick links buttons.
- IV. There should be good designs which are user friendly
- V. It should also have contacts information, location, etc.
- VI. Also social links like instagram twitter/X github, LinkedIn. Please hover the icons from fontawesome.

THE ADMIN CONTROL:

❖ I need well designed admin page that is easily accessible.

1. On home I have to see an input spaces for uploading room details and choose if it is available or occupied
2. It should have a hidden table containing all details in of rooms like size, width, height, floor, description, price, picture and other features it will be visible when I click view rooms.
3. I want also a search box for room (id, name, floor or size).
4. It will have access delete, edit, and view rooms
5. Also there is another feature hidden table containing booked rooms it will show some deatails of room and other information from input from form of book room in index.php it will be visible when admin clicks view bookings.
6. The input form for posting job on index form also will be hidden and displayed when admin click post a new job button it will have job description, deadline date for application the gender of needed worker(i.e: male, female or both), .
7. Also I need the button to see applicants of jobs it will contain: name, national id, cv (I will be able to open it and read it), application date, and his/her gender.

THE OVERALL DESIGN:

- ❖ I need a well-designed and responsive website and keep in mind that this color(#e74c3c;) is my fav color so use it on background on buttons and hovers and on logo
- ❖ I think you know the best design for footer and header so try your best I like your work.
- ❖ I need a best powerful database.

Thank you deepseek!
